Keywords: Knowing Southeast Asian Regional Countries, Dreamweaver MX

Abstract:

Know Your Website Creation Countries in Southeast Asia aims to introduce the countries in the region of Southeast Asia to their students in elementary school or secondary.

In the manufacture, use Macromedia Dreamweaver MX that starts from the stage of determining the structure of navigation, design page output, exporting to HTML pages, providing a link in every web page, creation and insertion of animation, web page processing, as well as how to upload to the web server.

With the added animation on every page of the website, making the display more attractive.
